

August 2009

Dear Health-care Provider:

We are pleased to inform you that effective immediately, IMOVAX[®] Rabies, Rabies Vaccine is available for both pre-exposure use and post-exposure prophylaxis. As a result, we have returned to our normal ordering process and it is no longer necessary to fill out the Rabies Post-Exposure Use Form and obtain a pass code prior to ordering IMOVAX Rabies vaccine.

As you may recall, starting in June 2007, sanofi pasteur began renovating its IMOVAX Rabies vaccine production facility in France to maintain compliance with the most current requirements of the US Food and Drug Administration (FDA) and French regulatory body, Agence Française de Sécurité Sanitaire des Produits de Santé (AFSSAPS). These renovations are now complete and the facility is approved and operational. As a result, IMOVAX Rabies vaccine is available without limits for pre-exposure use and post-exposure prophylaxis.

To order IMOVAX Rabies vaccine, please log onto VaccineShope.com[®] or call 1-800-VACCINE (1-800-822-2463) and speak to one of our Customer Service Representatives.

We appreciate your patience during our renovations and look forward to serving your rabies vaccine needs for years to come.

Sincerely,

Chad Hoover
Vice President, Marketing and Sales, US
